

Please amend the title of the specification at page 1, line 3 to replace
~~Compositions and Methods to Modulate Immune and Inflammatory Responses~~
with the following:

Method for Inhibiting Surface ATPase Activity of Regeneration and Tolerance Factor.

Please amend the specification by inserting prior to line 5, page 1 the following:
Related Applications:

This application claims priority from U.S. Provisional Patent Application No. 60/446,499
which was filed on February 10, 2003.

Please replace the paragraph found at page 12, lines 2 through 9 with the following
paragraph:

PBMC were obtained by ficoll separation and 2.5×10^5 cells per well were incubated in a
96 well plate in RPMI 1640 medium in the presence of 2 $\mu\text{g/ml}$ PHA, or RPMI alone. After 72
hours both unstimulated, and stimulated cells were washed twice in PBS, permeabilized with ice
cold 70% ethanol for 15 mins, and reacted with 7 μl anti-RTF-FITC, anti-CD8-PE (Pharmingen),
or isotype control antibody for 15 mins. Cells were washed again, fixed with ~~Coulter~~
COULTER fixative solution, and a cytopsin was used to transfer them to a positively charged
slide which was mounted with Dapco medium. Slides were then examined by confocal
microscopy.
